perising ecoporation, but with its usual adrothess by procuring the passage of an act of Congress during the closing days of the session which, without defying the dominion of the United States under the treaty of cession, required the incoming President to assert and protect it. The result has been to throw again upon the captains of the revenue cutters the responsibility of peacefully deciding whether Behring sea is or is not a part of the territory of the United States, and they can possibly decide only one way in view of what has occurred beretafore.

At the state department a specific claim was made by fishermen from Behring sea, but was successfully resisted by the United States, and had nover been practically asserted down to the time of the cession, that the diplomatic history and traditions of the United States would be finited to any contention that Behring sea is a closed sea from which the vessels or subjects of any power could be excluded. The present administration inherited the question. They state that Messrs. Bayand, Fairchild and Garland left it, and they have not yet specially considered it nor developed any conclusion upon it. Thore has been a general supposition that the activity of the revenue cutters which began in 1889, was centious way was intermitted in 1889, pend any the first part of the Aleka Commercial company.

No treaty statute, judicial decision or

mercial company.

No treaty, statute, judicial decision or executive proclamation or communication has ever defined what wafers are or are not waters of Alaska. At the opening of every lishing season the secretary of the presence with the proclamation of every lishing season the secretary of the treasury sends revenue steamers to their many sends revenue steamers to their many and a carlome the laws problishing analysis il sishing within the waters thereof. The captain of each revenue vessel considers this to be un order to prevent any scaling in Behring sea south of a line drawn southwestly between the St. Lawrence islands and the nilpact Siberian capea, because some years ago upon a hypothethelicase the teen secretary of the treasury expressed an opinion that the presidence of the United States in Behring sea was not, in view of the treaty of cession of Alaska, confined to a marine beague from the shore, as intimated by Secretary Boutwoil, but included all the water on the American side of the boundary line drawn sorses the sea in the treaty of cession. In the absence of the prominent heads of the government from Washington it is impossible to get any important expressions of opinion of cansequence on the Black Diamond. If they were present, their almost total ignorance of the question would produce virtually the same resulf. One of the consequences that seems to be governally expected is the hastening of the return of the British minister to his post. For three years the legation here has been constantly pressing the chaims of the British government, under the implies of the government of Canada, should not insist that the an open one. The Canadian Officials and the Scirure.

Orrawa, Ont., July 31 .- The greatest indignation is expressed in official circles at the so-called American outrages, reported from British Columbia as having recently from British Columbia as having recently occured in Behring sea. The minister of costums yesterday moraing received telle grams from Mr. Baker, member of parliament for Victoria, B.C., stating that an indignation sheeling was to be held there resterday to protest agrants the sature of the sealing schooner Black Diamond by the United States revenue cutter Rush. The minister immediately telegraphed to the collector of custums to go to Victoria for particulars of the schone, and received a telegram stating that the vessel shad been selsed sevently miles from land. A meeting of the cablinet was called in discuss the situation, but in the absence of fuller information no definite action was arrived at. The case will at lonce be represented to the British covernment and application will be made for the services of one or more of the war ships stationed to the Pacific count for the protection of Canadian intorests in Behring sea. The government has been advised that several of the sealing schooners are well armed and will imake a strong resistance against science.

Washingrex, July 31.—Section 1950 of the revised statutes of the United States denounces penalties of fines and imprison ment of persons and forfeitures of vessels and cargoes for unauthorized scaling "within the limits, of Alaska territory or the waters thereof," and the act of Congress approved May 17, 1394, for the organization of the territory of Ahaka commits the jurisdiction to inflict these fines, imprisonment and forfeitures to a district court of the United States established for that territory, and to sit at Sirka, Wrangel or obsewhere within the territory.

The present administration is understool to not be over friendly towards that enterprising corporation, but with its usual adventness it forestalls the possibility of coldness by procuring the passage of an act of Congress during the closing days of the session which, without defying the dominate of the United States and enter the treaty of cossion, required the incoming President to assert and protect it. Banson, Maine July 31.-As Secretar, Blaine passed through this city this even ag, a reporter called his attention to the declaration of a Boston paper to-day to the effect that it would be impossible for the effect that it would be impossible for the initional government to "austain the prepartion of Secretary Blaine that Behring sen is distinctly American water." The secretary simply remarked that it might be well for the paper in question to indicate the occasion, official or unofficial, where he had said any ting at all on that point. Mr. Blaine further stated that everything done on the fur seal question since the 4th of just March was in literal compliance with directions contained in the act of Congress approved by President Cleveland the last day of his term.
